

# How it works

At any time of day or night our highly skilled Call Advisors will be alerted if any of the following activations occur:

- 📞 The SOS button is pressed
- 📞 A Safety Zone is breached

- 📞 A Fall-Sensor Alarm is triggered
- 📞 A Medical Reminder is missed

- Auto-answer allows the monitoring centre to initiate conversations in loudspeaker.
- Built in fall-sensor (not on the watch) and 'safety zone' alerts provide a safety net of independence.
- Receive simple welfare checks and reminder messages e.g. medication.
- One touch SOS alarm button for help in any emergency.
- Speed dial keys, easily programmed to your choice of contacts.
